

WHISTLEBLOWER LITIGATION AND PROTECTION

At LHL we specialise in fighting for those who speak up. With over 30 years of litigation experience and having litigated against some of the largest law firms in South Africa, LHL is well-placed to work with you to ensure your integrity is restored and your rights championed.

SPECIALIST WHISTLEBLOWER REPRESENTATION FOR THOSE WHO SPEAK TRUTH TO POWER

At LHL we represent whistleblowers for the same reasons that courageous women and men come forward to expose wrongdoing, injustice, or fraud. We believe in turning the tide on corruption and ensuring that there is accountability, justice, and fairness, whether in the public or private sector.

Coupled with LHL's pedigree and experience, we work with some of South Africa's most respected clinical psychologists to ensure that you are able to focus on yourself and your mental state while we take on your matter.

After working with UC Berkeley's Business in Society Institute and the Women in Business Institute, LHL has pioneered certain groundbreaking litigation strategies that champion the rights of those who speak out.

FIGHTING FOR A MORE JUST SOCIETY

If you are someone who has been victimised because you spoke out against injustice, fraud or corruption - speak to us.

From our first free conversation, we'll listen to your story. If we work together, our team of whistleblower experts will be at your side with support and legal guidance at every turn - through government investigations, legal filings, settlement, or litigation if necessary.

All along the way, we'll help you understand what to expect and the best legal avenues for you and your case.

WE HELP WHISTLEBLOWERS STAND UP FOR THEIR RIGHTS

GUIDANCE ON HOW TO MAKE A PROTECTED DISCLOSURE

We work with one of South Africa's leading non-profit organisations to ensure that we are able to assist and guide you when you decide to make a protected disclosure. We will provide strategic and legal advice to ensure that your rights are protected.

DETAILED PROSPECTS OF SUCCESS REPORT OF YOUR POTENTIAL CASE

If you need direction and guidance on establishing whether your case has any merit, we will be able to provide you with a detailed report setting out the prospects of success of your matter, after reviewing all data and documentation provided to us. We also provide you with our estimation of the quantum of your matter.

WHISTLEBLOWER LITIGATION

We represent whistleblowers should a whistleblower wish to institute legal proceedings. We maintain transparency throughout the process and ensure you are kept abreast of all developments in your matter. We also provide you with an overview of the litigation process of a whistleblower claim during our consultation.

WORKING WITH LITIGATION FUNDERS

At LHL Attorneys we appreciate that many whistleblowers are not able to afford legal fees related to their potential claims.

In an effort to ensure that our clients receive quality legal services, we have established flexible fee structures to release the financial burden which many protected disclosure clients experience. We take matters on a contingency basis where, if there are convincing prospects of success, LHL will litigate the matter and receive a 25% success fee should we win the matter.

LEADING EXPERTS IN WHISTLEBLOWER LAW

LHL Attorneys is dedicated to playing a part in stemming corruption and fighting for and protecting the rights of whistleblowers

International Partners and Litigation

LHL works with renowned litigation funders and international law firms to determine whether there is a way in which we can secure funding for your case.

In order to combat corruption, companies and institutions must be held accountable for their actions not only locally but internationally. LHL has developed an extensive international law legal framework which, should a company have an international footprint, allows us to secure compensation for the harm suffered by our clients.

Our Protected Disclosure team has experience working in Silicon Valley, California with specialist experience in corporate governance and complex litigation. Our international exposure has allowed us to cultivate important partnerships and relationships with leading whistleblower law firms in the United States.
